To Whom It May Concern:

I am writing this letter to confirm that **Jae Gwan Park** is a successful graduate of William Lyon Mackenzie Collegiate Institute's **MaCS** Program. The MaCS Program is a specialized enrichment program at our school, which is specifically designed for university bound students who excel in math, science and computer technologies.

The MaCS Program is a 4-year program, which begins in grade 9. Students are admitted from throughout the GTA based on exemplary grade 7/8 results, an admission exam, and a student profile. Grade 9 students take enriched Math, Science, English, Geography, and grade 10 Computer Programming. The program continues to grade 12 with a continued emphasis in enriched core courses, problem solving, further developing critical thinking skills, active learning and clarity of communication in these areas. Students take part in numerous enrichment activities, including field trips (day and overnight), contests, AP exams, workshops, competitions, and presentations from guest speakers. Participation in extracurricular life is strongly encouraged and MaCS students figure prominently in leadership, involvement and innovation in our school. Enrollment within the program is maintained by meeting an academic standard, which is strictly enforced.

As the coordinator of the MaCS Program, I strongly believe that MaCS graduates leave W. L. Mackenzie C.I. with an excellent education, solid leadership skills, and with the ability to make a pronounced difference in their communities. They are exemplary citizens who will continue on an academic path that will benefit from their enriched and competitive secondary school education and training. For more information about the MaCS Program or about this student, please do not hesitate to contact me.

Sincerely,

Steven Leder
MaCS Coordinator
